3.3 REGISTRATION FOR SYMPOSIUM WITH DESIRABLE FIELDS.....5

**4 BENEFITS OF ADI WEB APPLICATION.....6**

# 1 Summary

This web application is developed in Microsoft ASP.NET 2.0 technology and MS SQL Server 2000 database. It has Ajax capabilities so the rendering on the browser is smooth. Only the portion of the page that is changed causes post back to the server, not the entire page.

The application main purpose is to be presentation site for the company ADI International Institute for Advancement of Drug Development. It shows the organizational structure of the company, its services to the clients, publication of medical and pharmaceutical literature etc.

The application has modules for registration of users that want to participate in some events that are organized by the ADI Company.

# 2 Introduction

The application is web based presentation site for displaying the latest news for the company with modules for registration on some events such as symposiums, courses etc. This web application is developed in Microsoft ASP.NET 2.0 technology and MS SQL Server 2000 database. It has Ajax capabilities so the rendering on the browser is smooth. Only the portion of the page that is changed causes post back to the server, not the entire page.

# 3 Web Site Description

## 3.1 Main screen

The application is hosted on web server and it can be reached by typing the URL of the web application in any web browser. When user starts the application, the first screen that is shown is like figure 3-1. On this welcome screen the user can see the latest news and events.
